## DAHLIA SEED

We have a limited amount of California grown Dahlia Seed, the very best mixed, large flowering types.

**ORDER IMMEDIATELY**

20 SEEDS \$1.00

*Sorry we have no  
GLADIOLAS  
to offer this season*

## DAHLIA CULTURE

Plant tubers 4 to 6 inches deep and about 3 feet apart in very well worked soil, keep top soil stirred, water only in very dry weather, then soak the soil about once a week.

Do not sprinkle the foliage, do not plant in dense shade as they like plenty of sunlight.

After killing frost dig roots carefully, store in a cool cellar where they will not freeze, laying the clumps with the stem part down if possible, this will reduce stem rot..

If your cellar is too dry store the roots in a box and cover them with sand or soil, peat moss is also very good if you have it. Cut the roots apart any time through the winter or spring, one eye to each division is as good as two or three, and sometimes better. The tops do not have to be cut off immediately after they freeze down in the fall.

Wishing you a great dahlia season.
